Professional Experience:

Velocity REO'S INC, Photographer 2019 - Present

As a Real Estate photographer my duties are when i'm given a field order locate that property and photograph it according to the order. After photographing the order I have to get online upload the Photographs and annotate any information that is required by the order. I also have to take special orders for GPS Photography Inspections and Video services.

ITNetwork Designs Inc, CEO 2000 - Present

As CEO of ITNetwork Designs Inc. my job duties were vast as a very successful web design / development firm my job ranged from making new contacts to website development and design. As well as making sure the rent was paid and the proper forms were filed with the government like taxes and General Operations.

Somali American Community Center of Colorado, IT Tech 2005 - Present

I manage server and client workstations maintain network and provide information for acquisition of computers and software, installing operating systems and maintenance for a 20 computer datacenter for students. I design, operate and maintain website for SACCC on a volunteer basis, providing graphic design for brochures, flyers, business cards and professional correspondence. I supply web support for USCIS to assist in filling necessary paper work for citizenship assistance, to create supporting documentation, and temporary IDs. File for the lottery. Job search and resume creation.

I work with the Colorado Department of Human Services, Division of Colorado Works Fatherhood Initiative Be There for your kid program, Online Records for MIS System to Document Participants and create records for the state. I also to provide supporting literature brochures fliers and posters to advertise for active participants in the program. Assist with the documentation and filing of community activities to the department for reimbursements. Setup computers and projectors for meetings to support the speaker via power point productions created by collaboration between an interpreter and me. I collaborate with the board and team members to create proposals for grants to provide supporting documents and financial reports that I also maintain via QuickBooks.

A Ride Town Car - Denver Limousine Inc, Webmaster 2005 - Present

Webmaster, Designer, and Creator of aridetowncar.com. I maintain the website and the database. I am currently working on a geo enabled shopping cart that uses Google maps API V3 it has two search methods. One uses Google AutoComplete from Google maps V3 and the other for local Search uses Yahoo API that is far superior to Google's Local Search. Yahoo requires a JSON parser and Google is using the API. This information is then sent to a PHP Registration system with a user area that contains an address book and a checkout to make reservations quick. All this data is

available in the Administration backend where the dashboard shows current reservations and gives the admin all the information. I also maintain the SEO of the site making sure the entire website is coded in accordance with the W3C specifications HTML and CSS. I maintain the XML Sitemap and all SEO Links and backlinks. The site is and has been in the top 10 for keyword Denver Limo for the past 15 years. I maintain the books for A Ride Town Car via QuickBooks.

Accent Learning Systems, Director of Operations 2012 - 2019

At Accent Learning System my job is to recruit new students through use of the internet. We are a medical school that teaches CNA Phlebotomy and Dialysis. I am in charge of the direction of the school and the resources that are available to the students.
